Reflections

On The Lake

Lakeside sizzled this week and thermometers on buildings along Maine Avenue agreed that the temperature was 102 degrees on last Tuesday afternoon. . . . Bill Starr's temperature also hit the boiling point when an El Cajon newspaper stated that Starr had given up his Lakeside shopping center idea. Bill sizzled "IT AIN'T SO!" His project here is being held up until sewer lines are installed next year. . . . an article in the daily press to the effect that the lake was to be dedicated last Sunday caught the Chamber of Commerce with its water down. As a goodly crowd gathered for the festivities, Mrs. Carey suggested that if you're going to dedicate the thing some one better put some water in it, followed a wild scurry for hoses, cans or hot water bags. Somebody offered some pictures of the lake brim full, but all was useless, there were none of the wheels present to do the squeaking. Harvey Hoffman offered a speech he had been saving for such an emergency, but he overslept, missing the confusion altogether. L. D. Willis, grasping the situation, took the bull by the horns and pointed out points of interest; the pavilion on the lake where the band was to play and speeches heard, where the first fish was to be dropped in and pointed out that the slurping sound on the water was Old Sol drinking up the lake. He also pointed out the shortest distance to his place of business. . . . G. V. Byrd displayed a number of antique watches that he was going to time the speakers with; Wild Grape, local expert pointed out where his hot dog stand was to be set up, Jack Ramsey produced drawing for his TV booth where things would live up when the program got dull. F. L. Boyd likened Lakeside to Sutter's Mill, that another gold rush was not too far off. Mrs. Carey revealed her latest recipe and by unanimous vote the meeting adjourned to the Lakeside Cafe for fish and chips.

FELLOWSHIP MEET

More than 500 persons are expected to attend Fellowship Sunday, tomorrow, at First Baptist Church.

Cake and ice cream will be served after the services.

STUDENT CLASSES

Students of Baha'I meet every Tuesday morning at 9:30 in the home of Mrs. Andrew Smith on Oak Drive, Lake Farms. Interested persons are invited.

LAKESIDE BOOSTER

W. E. Street, formerly of Springfield, Missouri, has enjoyed his five years here with his wife, Essie. Having worked in temperatures of 110 degrees, he thinks the weather here just right.

The Streets have a son, Velt, who resides in La Mesa and a son Hubert, at Pacific Beach.

10,000 Aided By Fund Drive

Some 10,000 epileptics live in San Diego County, and more than a million throughout the nation, but only 20 percent are getting adequate treatment, according to the county chapter of the California Epileptic Society.

But a new effort, the Parade of Pennies, hopes to raise funds for treatment that could free 75 percent from seizures and enable up to 90 percent to hold jobs. Charles A. Pratt, a Yellow Cab Co. official, who heads the local drive, said the "great tragedy is that 600,000 epileptics are youngsters."

Pratt said epileptics too often try to fight their affliction with patent medicine, and, since we make fourth - class citizens of them, they try to hide their epilepsys.

Pennsylvania

Meetings at Hard of Hearing Hall, Herbert and University Ave.

School T-V Show Tues.

Second program in a series of three elementary school television lessons on "Man in Flight" will be presented at 10:30 a. m. Tuesday, May 22, over KFSD-TV, Channel 100. The series, which has been prepared by the Institute of Aeronautical Science in cooperation with the San Diego City Schools television office, began last week. The final program will be given May 29.

Although designed for in-school viewing by sixth grade classes in connection with the aeronautics study unit, the programs also are of public interest, DeGraff Stanley, city schools television producer, said.

Last week's program featured the physical aspects of Bernoulli's principle as applied to flight, with Dwight Bennett, chief of aerodynamics at Convair, as instructor.

The second program will explain the adaptation of the air screw for use in the propeller.

Blowing A Hot Trumpet

PITTSBURGH, PA. — Dorothy Langstaff appears to be giving out with a few hot licks on this trumpet-like glass instrument. But there's more than hot air to the picture — it shows actual glass shop work at Gulf Oil research laboratories, where Dorothy is blazing a new career for women. When Dorothy began as an apprentice, old timers predicted no woman could make the grade as a craftsman in the skilled scientific glass field. Today, at 26, fellow workers acclaim her the nation's top woman glass blower.

Berths in the SCIF semi-finals held at Chaffey Jr. College May 19 were secured by 12 Foothill spikesters. These members of the squad qualified in the Preliminaries at Balboa, track May 12.

In the A Division Jim Walton sped out a 20.3, 180 low hurdles to capture second in his heat. This was a little of his school record of 19.8, which was set in a track meet with Helix. The best time of 20.1 won the heat.

Jim Griswold nudged out his own record of 4:28.6 in the mile when he ran it in 4:27. Griswold was able to secure a third spot in his specialty as he was nosed out by two of the top milers in Southern California, Monzongo of Hoover and Arroues of Fullerton.

Grossmon't Jim Wade uncoiled with his best effort this season as he put the shot 54 feet. He was

second to Hooverite Madrigal. Rodger Olander pole vaulted 12 feet to top his previous height of 11 feet six inches. He took a first in this event.

Lary Armstrong added another event to the Grosmont total as he heaved a shot to a new school record. His distance was 54 feet 3 1/2 inches. Jerry Grant also qualified in the shot by heaving the iron over 49 feet.

Les Kellogg tied for third in the 70 low hurdles. His time was 9.4. Jerry Nunez was a one man army for the C Division. He placed in three events, the 120 low hurdles, 140, the 180 yard dash and the 440 relay team. His time of 14.0 in the hurdles was one-tenth of a second of school record.

Jerry Carlton put the shot 53 feet and relay team, comprised of Ronnie Orlo, Cyril

Zone Director Stirs Bee Hive

Lakeside area residents are protesting a public hearing to be held in San Diego after the Planning Commission makes its recommendations to the Board of Supervisors. A number of local residents work during the day and could not attend the hearing.

A number of petitions are being circulated throughout this area protesting the zoning study.

Dr. Glenn Miller, county planning director and his assistant, Richard Weiser, weathered a stormy zoning hearing during which persons threatened to take petitions direct to the Supervisors. Miller only commented that petitions would be received.

"The Planning Commission merely conducts hearings and recommends type of zoning needed in an area. Zoning authority rests with the Board of Supervisors, who are not dependent on a vote of the residents in the area," Miller pointed out.

and basic principles of jet propulsion. Hideyoshi Nakamura, design specialist, Convair, will instruct this lesson. The final program will contrast flight in outer space with the altogether different problems presented by flight within the atmosphere.

Mothers Outfit Winning Band

Mrs. Grace Mennone is the director of the award-winning Lakeside band.

In the band's first appearance outside Lakeside the group captured a line award trophy in the National City Maytime band review, last Saturday.

Although band members had no uniforms, mothers of the 55 boys and girls whipped together gray shirts and trousers for the boys and gray skirts for the girls.

SUMMER SCHOOL

Preparations for daily Summer School are being made at Wednesday Workshop sessions of the Church of the open Bible in Kiwanis Hall.

Pastor Rev. M. O. Brown announces that Rev. Aubrey Ashburn, recently graduated from the Bible Standard Institute, Eugene, Ore., is now assistant pastor of the church.

VISITORS

Mr. and Mrs. Glenn Faris of Hillsborough, Ohio, are enjoying two weeks here.

Ohio

Thursday, May 24: Worden Colts vs. Farm Bureau.

Saturday, May 26: Optimist vs. Worden Colts.

Tuesday, May 29: Farm Bureau vs. Optimists.

Thursday, May 31: Worden Colts vs. Community Church.

The Ladies' Auxiliary will be on hand with refreshments for sale.

Lifeguard Jobs Open

Applications for the position of lifeguard for the Summer season are now being accepted at city civil service, Room 456, Civic Center, for men between the ages of 18 and 30.

No previous experience is required for the positions which have a salary range of from \$269 to \$296 per month. Applicants must be at least five foot seven in height and weigh 150 pounds or more. Good vision and proven swimming ability are requisites.

San Diego provides lifeguards at 15 beaches during the Summer vacation season.

Marines Star In Radio Show

CAMP PENDLETON — "Marines in Review," will salute the nation's Armed Forces on Saturday, May 19, over the ABC radio network, (KBAB, San Diego, 6:05 p. m., and KABC, Hollywood, 11 p. m.)

The Camp Pendleton all-Marine Band will play marches of all services. Other numbers include "All Ashore," and the World War II hit, "Now Is The Hour." Corporal Charles Rathkamp will sing "This is Worth Fighting For."

The special salute was performed by "Marines in Review," in 1954 and '55. It is being repeated by popular demand.

"Marines in Review," now in its fifth year over the ABC radio network, originates from Camp Pendleton, the world's largest Marine Corps Training base. It is written, acted and produced entirely by Marines.

Doctors Will Aid Health Campaign

Three hundred seventy-five members of the San Diego County Medical Society, interested in the diagnosis and treatment of cancer, voluntarily have agreed to examine cancer patients, or patients suspected of having cancer through a co-operative plan between the San Diego County Medical Society and the local branch of the American Cancer Society.

The contribution of physicians was made public after an analysis of questionnaires sent to them by the Cancer Committee of the San Diego County Medical Society in bringing up to date a cancer referral panel of physicians, according to Dr. Clarence E. Rees, chairman of the Medical Society Cancer Committee, and chairman of the local cancer group's Executive Committee.

In addition to treating patients with cancer, or following diagnostic procedures to determine the presence of cancer, the doctors have also stated their willingness to assist when necessary on a part-fee basis, the latter a tradition of the medical profession, said Dr. Rees.

The doctors also have agreed to give talks to laymen's groups in order to advance the educational phase of the program of the American Cancer Society. The American Cancer Society, through the San Diego Branch, supplies recent treatment material and local education on the care of patients.

VACATIONING

Dorothy Ewing is enjoying several weeks of vacationing.

FOR SALE—Zenith TV like new. Refrigerator and stove. AT 1-6117.

Children with hearing trouble repeat their grades four times as often as children with normal hearing.

At least two-million children in the United States have impaired hearing and the hearing of more than 20-million others in the 5 to 17 age bracket is receiving virtually no attention, according to the American Hearing Aid Association. (There are about 34,775,000 school-age children in the U.S. Fewer than 300 cities and only 21 states require periodic hearing tests in public schools.)

Most parents whose children suffer a slight loss of hearing don't discover it in time to prevent a greater and more serious loss.

Parents should watch for such tell-tale signs of hearing loss as inattentiveness, awkward listening posture, excessive fatigue, slowness in learning, shyness in playing with other children and voice peculiarities.

From 50 to 60 percent of all hearing impairments among children can be corrected if discovered early enough.

SOUND Facts

ACOUSTICAL ENGINEERS ARE SEEKING TO ALTER HIGH-FREQUENCY JET NOISES TO INAUDIBLE LEVELS THAT ONLY "DOGS" CAN HEAR!

SINCE PARIS, FRANCE HAS OUTLAWED AND ENFORCED HORN-HONKING LAWS, ACCIDENT RATES HAVE DECREASED WITH THE NOISE....

CRACKED, UNSIGHTLY CEILINGS CAN BE REDECORATED WITH SOUND ABSORBING TILES FOR SLIGHTLY MORE THAN REPLASTERING—SO STATES THE ACOUSTICAL MATERIALS ASSOCIATION!

SOME OIL WELL DRILLERS ARE NOW ENCLOSING DERRICKS AND LINING THEM WITH ACOUSTICAL MATERIALS TO REDUCE NOISE IN THE SUBURBAN AREAS.....

HEAR BIG TIDES NOW!

Something New—Something Different!

What better way to make a party a success than to serve something brand new! Brand new and delicious Country Kitchen syrup on these wonderful apple puffedakes will help celebrate Valentine's Day and Pancake Day in grand style. And this year a party is practically a "must," since both these special days fall on February 14th.

A pancake party will be just as appealing to young Americans as for the English children who have celebrated Pancake Day for years. The boys will demand more than one tall pile of the delicious cakes... and the girls will very likely match them, pancake for pancake! So—be prepared with plenty of melted butter and plenty of the new Country Kitchen syrup whose price is as attractive as its flavor! For a perfect accompaniment serve mugs of hot cocoa.

Puffy Apple Pancakes

- | | |
|--|------------------------------|
| 2 eggs | 2 cups grated unpeeled apple |
| 1 cup milk | 1 tablespoon lemon juice |
| 2-1/3 cups biscuit mix | 2 tablespoons sugar |
| 2 tablespoons sugar | |
| 1/4 cup salad oil, melted butter, or other melted shortening | |

Beat eggs with beater until soft peaks will form. Blend in milk. Add biscuit mix and sugar; mix just until thoroughly dampened. Fold in oil or shortening. Then fold in apple, lemon juice and sugar. Spoon onto medium-hot ungreased griddle. When puffed up and bubbles begin to break, turn and cook on other side. Serve hot with butter and warm Country Kitchen syrup. Makes 15 to 20 pancakes.

Sun-Faded Togs? Here's Good Tip

You can't prevent fading of outdoor togs caused by sunshine and frequent laundering—but there is certainly something you can do about it! You can easily restore their color to look like new—or tintex to an entirely different color—as mother and daughter, above, have done. All-fabric dye (available in 50 fashion-new colors), a wooden stick or spoon, a vessel to hold the article without crowding, tap water, a quart jar for the dye solution, and color remover are all you need to effect the magical transformation.

Because sun-fading is usually uneven, your best bet for a successful dye-job is use of the color remover first, according to the Tintex Home Economics Bureau. The color remover, like the dye, requires no boiling, so it can be employed safely on man-made, as well as natural fibres. One more tip. If your slacks are worn at the cuffs, cut them down and make a pair of pedal pushers for yourself or teen-ager. Then re-dye, so that neither you nor daughter will get that hand-me-down feeling.

New Safety Door

CHICAGO — This exclusive inside door release is the solution to the problem of children getting trapped in refrigerators. Michael Brent is showing Suelen Helland the new life-guard release developed by Admiral research engineers which glows in the dark and opens at the slightest touch. Should a child enter the refrigerator while his mother is cleaning it, all he has to do is touch the circular button to get out.

Over 110 children have been suffocated inside abandoned refrigerators as well as in units still in the home during the past 10 years, 18 of them in 1955. The problem has long concerned the refrigerator industry, reaching acute proportions in August 1953, when 12 children lost their lives in refrigerator accidents in a single month.

Your Home

By Frances Ainsworth

Sam my husband has become the most proficient handyman — fixes everything from the television set, to the clock, refrigerator, Tom's bike, my toaster and his own auto! And the secret of his success is one I'm going to pass along to all of you.

A few weeks ago I learned from a friend of a wonderful new Tinker-Kit available for home use, and ordered it. When it arrived last week my husband really got busy — for the Speed Nuts in the kit are useful for over a 100 things around the house! These small fasteners are made of heat treated spring steel and they're used in place of threaded nuts and lock washers on bolts and tapping screws. No amount of vibration will jar them loose and they don't have the damaging effect of ordinary nuts on surface finishes.

Sam is so enthusiastic about his kit that he's telling all of his friends to order them. They cost just a dollar and can be obtained from the Tinnerman Products, Dept. 14, Box 6688, Cleveland 1, Ohio. I've just ordered refills because we're finding so many uses for them at our house. Sam tells me that he's now using factory methods to apply fasteners in our home repair jobs, and that it's twice as fast and easier, too. Right now, he's repairing the boy's model railroad — there's just no end to the things Speed Nuts are useful for.

You'll probably want to pass this information along to your husband, too... you'll be amazed at the speed with which he accomplished those household repairs with the right equipment!

HEAD NOISE MISERY?

Try this simple home treatment. Many people have written us that it brought them blessed relief from the miseries of Head of Hearing and Head Noises due to catarrh of the head. Many were past 70! For proof of these amazing results, write us today. Nothing to wear. Treatment used right in your own home — easy and simple.

THINGS TO TALK ABOUT

BY FRANKLIN J. MEINE
Editor, American Peoples Encyclopedia

At one time the word "evangelist" referred to writers of the Gospels. In more recent times, a preacher, skilled in converting others or in leading revival meetings has been called an evangelist.

IN NORTH DAKOTA, EVAPORATION IS 15 TIMES AS RAPID IN JULY AS IN JANUARY. IN FLORIDA THE RATE OF EVAPORATION IS ONLY TWICE THAT IN JANUARY.

STAGE COACHES WERE USED AS EARLY AS THE 15th CENTURY BY KINGS AND NOBLES, BUT THE "HIRE VARIETY" DID NOT APPEAR UNTIL 1625, WHEN A FEW OF THEM COULD BE FOUND IN LONDON.

A Do-It-Yourself Steak

I am a girl with a liberal education. I can trace the history of American diplomacy, quote Shakespeare and type 40 wpm. But cooking has always been my downfall.

Then last week I visited the test kitchens of Whirlpool-Seeger Corp.

A cooking school was in progress and I settled down to take notes. Before I could write "How To Broil A Steak," I was under the wing of a home economist getting some practical experience.

My project was a two-inch T-bone. Objective: rare inside and crisp on the surface. Outside of charcoal cooking, I could not imagine how this would be done. But I learned fast.

Here's the trick: A new RCA Estate range has a barbecue meat oven that cooks with radiant heat—employing the same principle as a charcoal grill. For fast broiling steaks and chops, the barbecue pan may be raised close to the source of heat. An insert in the deep pan drains fats out of the heat zone for smokeless broiling.

It's a snap to broil a steak! All you do is rub it with garlic (optional) and broil on high heat until brown on one side—about 10 or 12 minutes. Then sprinkle with salt and pepper and turn. Home economists use tongs, a spatula or two spoons to turn cooking meat, since a fork pierces it and juices escape. When second side is browned, reduce heat if additional cooking is desired.

Record Flood

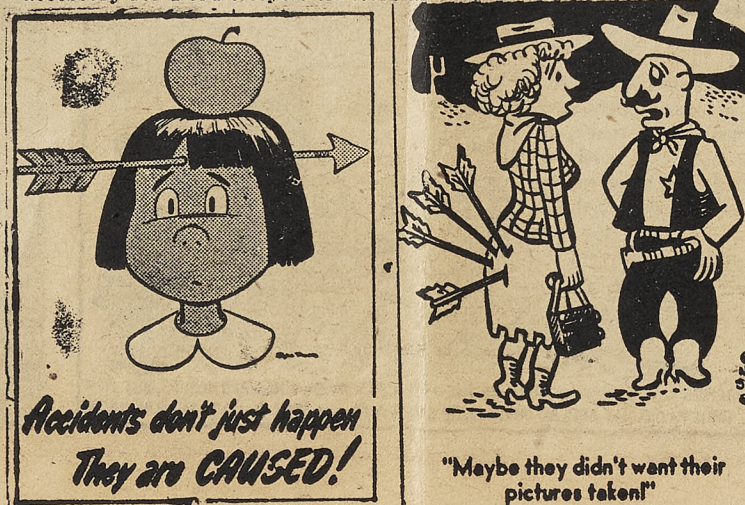

LA CROSSE, WIS.—One of the greatest floods in the Mississippi River's history is under way. The crest passed Hastings, Minn., after leaving St. Paul littered with debris. Pix is of a section of La Crosse.

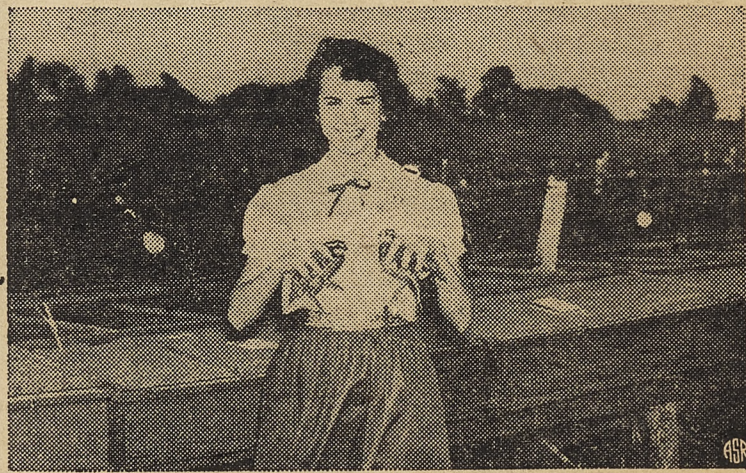

Power Steering Now Standard

Power steering is now standard equipment at no additional cost on all Ford tricycle tractors. According to the Tractor and Implement Division of Ford Motor Company, the linkage-type hydraulic unit, shown above, reduces steering effort by 80 per cent. Ford is the only farm equipment producer to provide power steering as standard equipment. Compact design does not interfere with tractor-mounted implements. Power steering unit is also offered as an accessory for Ford tricycle tractors already in use.

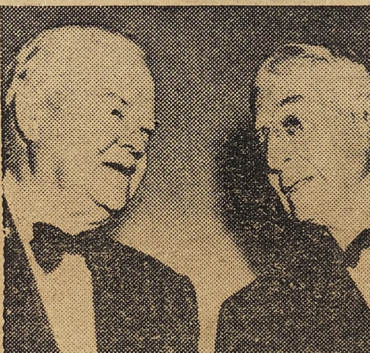

Fowl Worth \$5 a Pound

Fowl at \$5.38 a pound, eggs at 35 cents each. Those are prices Carl Lowrance, of Joplin, Mo., gets from the 30,000 quail on his farm. When Lowrance took up quail-raising two years ago, experts said he couldn't raise commercial-size flocks; brooder losses from disease would run at least 20 per cent. They did until Lowrance cut this to 3.5 per cent by adding the wonder drug aureomycin to the chicks' drinking water. Now he finds it impossible to fill all the orders he raises.

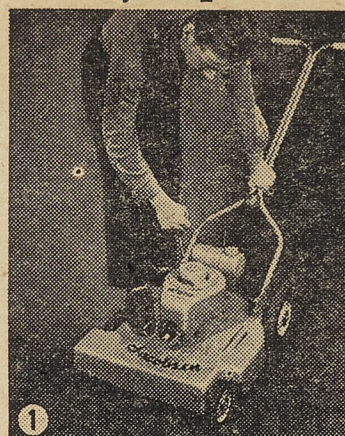

Hoover and Baruch

NEW YORK—Herbert C. Hoover (left), our only living ex-president, and Bernard Baruch, who has been advisor to many presidents, chat as they attended a dinner.

Safety Tips For Power Mower Users

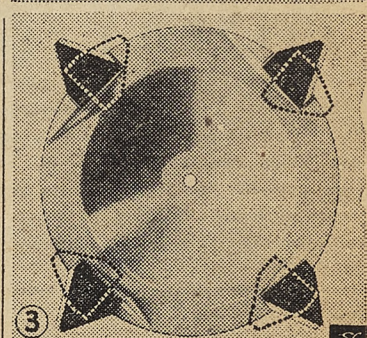

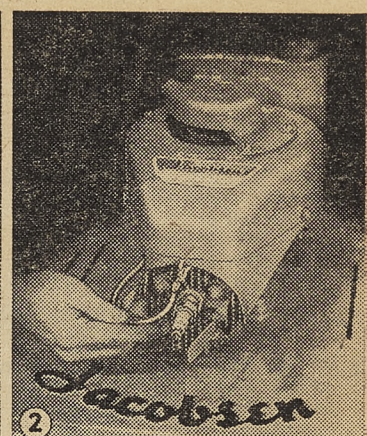

RACINE, WIS.—This season power lawn mowers will be operating on more than 10,000,000 lawns—a 2,000,000 increase over 1955. This will result in a corresponding increase in the risk of accidents to careless users, Charles A. Livesey of a leading manufacturer of power mowers here, warned.

Much progress has been made by manufacturers of power mowers in the design of equipment to provide maximum safety for operators. An illustration of a new development in safety engineering is a "suction-lift rotor" cutting unit (Picture #3) which is now standard on rotary mowers produced by Jacobsen Manufacturing company.

Elimination of a straight steel cutter bar and substituting four cutter knives on a disc reduces by 80% the possibility of picking up and throwing such objects as bones, nails, bits of glass, or stones. The rotor's four cutter knives will retract on hitting a fixed object such as a curb, sprinkler head, or iron pipe thus minimizing the chance of the knife's breaking and projecting the broken piece across the yard.

For users of all power mowers, reel or rotary types, he has these safety tips:

1. Start the mower on level ground, make sure your feet are away from the cutter bars or

blades (Picture #1). He recommends placing one foot on the mower deck, with one hand holding the handle to keep the machine firmly on the ground.

2. Learn how to stop the mower or how to put it in neutral quickly.

3. Go over the lawn before mowing to remove rocks, sticks, wire and other foreign material.

4. Be sure children and pets are clear of the machine.

5. Be careful of your footing when mowing on inclines.

6. Don't make any adjustments, remove clogging grass or sticks, or reach in front of the mower while the engine is running. Always disconnect the spark plug wire when making adjustments and keep hands, feet and loose clothing away from moving blades, reels, motor belt, and exposed chain. (Picture #2)

SUNDOWN ON THE PACIFIC SHORE

A novel about the Great West

BY RENAN PREVOST

Copyright by Renan Prevost, May 1955 All rights reserved

PREFACE

All thru the West there are Ghost Towns. Mostly in the region of the gold mines, of the wild, reckless days of 1849 and after. There are ruins of buildings and etc., which have a story, of the days, of glory and easy wealth for some men; and disappointment and tragic passing for other men.

About every city there are happenings of the past which are not always recorded; some men leave great names for their accomplishments, and land marks are named after them such as Parks, Streets and Schools. Also there are men, the workers who have "done the work" who are usually forgotten, with their passing on from this world. This story is about these men of great courage, supreme courage. Many of them arrived here without funds, and so gainful employment was necessary and that was work—hard work. Work not in line with their skill in a trade or profession.

Ghost towns have their story. So stories exist about buildings, water works, factories, railroads and other endeavors concerned with the earning of a livelihood. These stories become interesting, because they portray a life during the days of the past, almost forgotten. Great buildings or public utilities are usually known by the name of the man or corporation which caused the construction. Very seldom is any credit given to an architect, or the men who actually did the work. These were the men—"the brains" who were responsible for the erection of the structure or etc. And so this novel is about those "brains" and how they came West and what their life was like.

There are certain things effecting the economic welfare of men, which cause them to migrate. Generally it is promise of better living conditions or opportunities of easy attainment of wealth, thru land booms, new agricultural crops such as rare fruits, a better livable climate, as an aid to regain health, or as in the case of the colonization of this great country—an escape from persecution or oppression.

Men have been traveling to the West for generations, so we travel West with our characters, starting in 1880.

AUTHOR'S NOTE

Any similarity of names or places is merely co-incidental. All characters, dates and places are imaginary. The author has endeavored to use names of his own invention. If by chance the name of a living, or deceased person, or relative has been used, or any similarity thereof, the author offers apologies, for an unavoidable accident, which sometimes happens.

The author wishes to acknowledge, with thanks and sincere appreciation, the help that many old residents of the locale have supplied. Much of the material used has been obtained during many years of taking notes. Many of the yarns, stories and hearsay have been combined to make this novel.

CHAPTER NINETEEN

A Telephone in the Livery Stable.

A Reception at the Twitcher Home.

Jerry Goes to Florida to Purchase Lemon Trees.

Twitcher's Trip to Cuyamaca Mountains with

Continued from last week

"How much drop is the line of water flow from Blue Mountain Like?" asked Merryweather.

"The elevation of the lake is forty-six hundred feet to eight hundred feet here. That is not too much drop, because it is a rock strewn canyon. Not much loss of water because formation is not very porous. The big loss of water is in the poor condition of the flume. I believe it could be held to a five percent loss, when properly repaired," suggested Twitcher.

"How would you repair it?"

"I would line the flume with two-ply asphalt paper, not all the flume, maybe just in the bad places, but if necessary the whole length," said Twitcher.

"That would take a lot of roofing paper. Did you figure how many miles?"

"Yes, I did. I have the figures in my office," answered Twitcher.

"That fried rabbit smells good, allowed Merryweather.

"Yes, I like it. I am not much on fancy foods, just plain cooking, bread, butter, meat and vegetables is my dish," allowed Twitcher.

"You certainly appear healthy and strong. Good food and an outdoor life must make for a strong body," said Merryweather.

"Yes, all those, and first a good wife, a real understanding wife."

Leaving Lakeside next morning, they traveled a mountain, and flume and tunnels along the route, and finally reach town road to El Cajon, then toward Alpine, inspecting trespassing Green Valley, where they camped for the night.

"Well, my friend, how do you like our mountains; our fresh rabbit meat, and above all, the great outdoors?" asked Twitcher.

"This is a grand country. I enjoy it very much, really I do."

"What is that over there? It looks like an old orchard," said Maryweather.

"That was an apple orchard at one time, however, it is abandoned now. There is a story about that place. Maybe someday I will know all the details."

The camp was under a giant oak tree.

Next morning, and real early it was, they were again on their way.

The climb up the five mile Viejas toll road was slow and tiresome. Such a narrow and crooked road, and really just a rock strewn trail. A treeless waste land was that five

miles, but they were soon to witness a different land at the top of the grade; a new mesa land.

Several times they stopped to look back to the west, A really grand view toward the blue Pacific in the far distance.

Here a land of large trees, oak, and then in the distance the mountain pines and cedars. At that elevation of three thousand feet the very air was different. This, a land of occasional summer rain and these immense pasture meadows were indeed different than what they passed through to get here.

The men camped here under a giant oak tree. This was a grand day, indeed. They started at daybreak, now it was twilight, and the sun was setting far to the west. This land of trees, nature's own trees, not planted by the Yankee newcomers. How restful was that night. Pure mountain spring water for drinking, and a supper of fresh fried mountain rabbit meat. A restful night and experienced by both men. The everlasting creaking chirp of the crickets; truly nature's own nightly watch, guarding eternally, the great outdoors, under the heavenly canopy of stars. When crickets chirp their watch, then all is safe from harm, but when the creaking chirp stops, then danger is in store; strange animals or men approach. A real rest in the quiet of the great outdoors, of fresh air and peace.

Morning came and after a good breakfast of flapjacks and coffee, the men started out again.

Endless pasture land; plenty of trees for shade and shelter for man and beast, not a forest, just scattered giant oaks.

The next stop was at Descanso, and the usual store and Post Office, blacksmith shop, and water trough for the horses.

As Twitcher knew all the residents of this great land, he stopped and visited, as usual. Always making a small purchase of some kind.

"That is a queer name," remarked Mr. Marryweather. "Descanso, what can it mean?"

"It is Spanish, and it means 'rest.' This is a resting place. The Indians have their Catholic Church here, see it over there, and the usual burial grounds nearby," said Twitcher.

Then they made a left turn and proceeded toward the mountain lake, on to the pines, firs, and cedars. While traveling, Twitcher told of his trip to the Laguna Mountains.

"In nineteen-oh-five, the year of the great Colorado River flood, several other men and myself camped in the Laguna pine forest hoping we could see what is now known as the Salton sink. There is a forest of straight pine and cedar trees; on the eastern edge of the trees and on the brink of a steep cliff. It was almost a straight line. Here trees on one side and desert on the east. A dry, semi-parched land of bare hills and canyons, with very little stunted brush growth. Desolate in all appearances, yet strange and doubtful as to what water would do if available. Some men claim that great expanse was at one time a great ocean, extending North from the Gulf of California. A land of grandeur and a land of desert waste land, side by side. A grand land of forests, livable climate; fine growth of trees, and an undergrowth of ferns, and manzanita bushes, refreshing springs of water, and the lake; oak trees, and edible acorns.

"There the land of woodpecker pines. Several inches apart are holes made in the bark of the trees; these holes are filled, one acorn to a hole, by the woodpeckers. There they deposit an acorn for future food supply. But they do not eat the acorn. During the so-called storage period, a worm hatches in the acorn, and usually, there is a woodpecker, remembering the satisfaction of a juicy morsel, returning for the earned meal."

"That forest, at an elevation of five thousand feet, covered with snow in the winter, and a land of charm in the summer, bordering a desert on the east. In the distance of one mile to the east, a drop of a thousand feet to a torrid sand badlands, then further on to a sink two hundred or more below sea level. From the shade of the pines a person of normal eyesight can see the endless acres of a great valley, in ancient times an inland sea. The bed of oyster shells, and high water line, at sea level are grim evidence of bygone times, not seen by our generation," so ended Twitcher.

"That is interesting, maybe we will go there some day," said Merryweather. Then after a little pause:

"Why did you happen to make this trip?" asked Merryweather.

"Several men wanted their vacation in the mountains, so they furnished everything, and paid all expenses, and invited me to come as guide, escort, and as one man said, general information department."

"Well, I can say they certainly picked the right man for general information department," said Merryweather, adding, "Tell me about the valley."

"It is a great delta land below sea level. The lowest point is at the Salton sink. More than two hundred feet below sea level, that great expanse of sand waste land unequalled in heat and dryness. To the southeast of the Lagunas is what is known as Mountain Springs. Whole hills of large cobble stones, thousands of acres of them, heaved up in piles, an old river bottom of a great stream heaved up on hills, in canyons, heaps and heaps of stones, granite stones, some good granite, some disintegrated. The wind whistles through those canyons. It is known as the 'fire escape.' Escape from the fiery heat of the valley."

"Yes, there is the California Desert—land of little or no beneficial rainfall," remarked Twitcher.

"Is it possible that there is never any rain there?"

"No, the rainfall is not beneficial for crops. I have been told that when it does rain there, it is usually a cloud burst. Several inches of rain in a matter of minutes or so. It is a case of water, water everywhere from the ground up and up. I have traveled down there and there are countless numbers of creek beds but all dry, no water but all had the appearance of having a flow of water at one time. It is a strange land of sand, just sand. Sometimes I wonder what it would be like if it had adequate rainfall throughout the year," remarked Twitcher.

"Yes, sometimes we all wonder about such things. What kind of rocks are at the Mountain Springs road?" asked Mr. Merryweather.

"Granite rocks."

"Granite?"

"Yes, all heaved up in piles like mountains. There must have been a gigantic upheaval at some time; because the rocks are round, or partly so. They have the appearance of being originally in a river bed, or large river bottom. Mountain rocks are angular, only river-washed rocks are round," said Twitcher.

"I would like to see that place."

"It is beyond comparison. It is very hard to describe, so much of the rocky wasteland is there it is hard to believe. The mountainous piles of huge rocks seem to be in endless placement."

"What is the valley like?"

"Well, from the top of the mountains to the bottom of the grade is about ten miles or so. Then as far as we could see is a level valley floor. According to the survey the land along the border is about forty feet below sea level in one place."

"You say the valley is below sea level?"

"Yes. The Salton sink is more than two hundred feet below sea level," said Twitcher.

"What is the land formation between the Salton sink and the Ocean water of the Gulf of California?"

"Just a delta of silt, washed down by the Colorado River. It is claimed that the river would alternate in flow, from the Gulf to the Salton basin. It starts like this. When the Salton basin would be full of water from the Colorado and up to the level of the river at the delta, then the river would cut a channel through the delta and flow into the Gulf, until the water in the Salton basin was all evaporated, or or partly so; thereby leaving a basin or sink about fifty miles long and several miles wide. It being sea level at the river and gradually becoming below sea level at the northern point, it is over two hundred feet below sea level. Then during a flood season, usually in the Spring, the river would cut a new channel and flow into the Salton Sink. And so the same process would be repeated. It is claimed that there are certain marks, like an ancient beach and high water line at sea level many miles inland, which are claimed to be proof that at one time the Ocean extended to that point. There are beds of oyster shells in another place," said Twitcher.

"That could be possible, but what would happen if the Colorado River were stopped from flowing with its load of silt? Suppose a series of dams were built on that river?"

"Well, we hypothesize a case, if you like."

"All right. Suppose the river was stopped, would the head waters of the Gulf be on a falling coast line or a rising coast line?" asked Mr. Marryweather.

"That I would not know."

"Let us suppose it would be a falling coast line, then the waves of the Ocean would move away the delta silt."

"Yes, that would be, because I have heard that there is such a thing as a falling coast line," said Twitcher.

"If the delta was melted away by the waves, and it kept on doing so until the waves reached a point at sea level, or below sea level on that delta; and then the Ocean would rush into that sink. That would be the end of that valley," supposed Merryweather.

"You mean that such a condition could be possible."

2nd ANNUAL PRESENTATION

SERAFINA

THE PLAY BY JEROME GERARD; MUSIC BY RENAN PREVOST

with additional numbers by
H. Adair Thomas

LOVE - INTRIGUE - COMEDY

A first rate tourist attraction must be original, entertaining, enjoyable and it must be seen only in one place. Tourists travel the world over to see unusual attractions. "Serafina" and "Stars in the West" can be annual attractions for San Diego. There has never been anything offered in San Diego, to compare with the possibilities of these Historical Operettas, excepting, the two great Expositions - 1915 and 1935, in our wonderful Balboa Park.

Why we offer these Operettas - The presentation of stage shows and etc., which have been produced for years, elsewhere, does not create prime tourist attractions of merit, for San Diego. Because as a rule tourists do not travel far to see stage shows, which can be seen at home or nearby.

Or to hear music which is regularly used on the radio or on records for home playing. All of which, although, said shows and music are acceptable for amusement; but, they are in reality "common stuff" and seldom attract the well informed and enlightened tourist, seeking the unusual.

A tourist attraction of supreme merit is the Historical Operetta. And produced annually in a Civic Theatre located amidst the fine buildings of Balboa Park, which is world famous and the center of culture of San Diego. We have the Russ Auditorium which will suffice until a Civic Theatre can be provided. We have the talent and the most enjoyable operetta - "SERAFINA"

These Operettas are new, with appeal unlike the over-played stage presentations of the past years. So, We offer these original Operettas, they can be tourist attractions unsurpassed; because they have not been produced elsewhere, most of the music has not been published, or offered for public use. Here are two historical Operettas, in all that it implies, about our San Diego.

The historical facts presented in the Operettas are such as has never heretofore been presented. Participation is available for Patrons and Sponsors send communications to -

OLD SAN DIEGO

MISSION SAN DIEGO DE ALCALA—
from Old San Diego, 20 minutes
auto

(Above) The stately date palm brought here and planted by Padre Serra's land expedition in 1769 has weathered the ravages of time—still stands at the foot of Presidio Hill in Old Town.

(Above) Glen's convenient Curb Service for quick snacks, Taylor and Juan Streets.

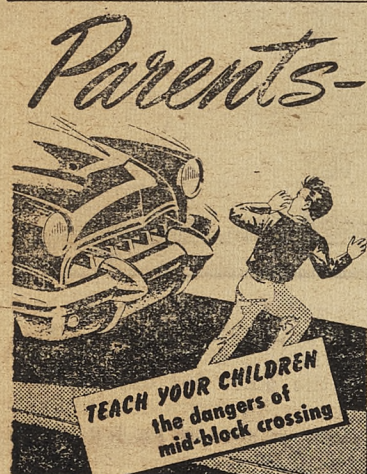

MARINE RECRUIT DEPOT

Training site for all U. S. Marine recruits from the western part of the country. Base open to public daily between 1 and 3:30 p. m. Review open to the public at 3 p. m. each Friday.

MISSION SAN LUIS REY

East of Oceanside, this mission was founded in 1798 and is called the most beautiful of the early California missions.

The U.S. Naval Hospital in Balboa Park is one of the largest, most beautifully located, and best equipped naval hospitals in America.

PALOMAR OBSERVATORY

Palomar Observatory, one of the greatest scientific achievements in modern history, is located in San Diego's nearby back country. It is the home of the world's largest camera, which instrument will permit the moon to be photographed as if it were but 28 miles distant.

Ideal climatic conditions are essential to the successful operation of this observatory. After years of searching for a location offering clear atmospheric conditions throughout the year, officials selected Palomar Mountain.

On the site also will be found two other observatories, one is a reflecting telescope situated atop Palomar Mountain 68 miles northeast of San Diego via Escondido and U. S. Highway 395. Turning east at Escondido, the road signs are clearly marked.

MORMON MARKER

Commemorating one of the longest infantry marches in recorded history, a marker was dedicated in Box Canyon on March 25 1954.

Box Canyon, in the desert east of Julian, is a narrow defile through which the famed Mormon battalion broke its way

EMBARCADERO AND FISHING PIERS

San Diego's Embarcadero provides an endless variety of interesting waterfront activities. Ocean going liners, fishing craft, naval ships, cargo vessels and

Better drive at 40
And live to 80.
Than drive at 80
And die at 40.

SAN DIEGO LIBRARY

Main library, E. Street between 8th and 9th in downtown San Diego. There are many branches of the library in all parts of the city.

CONVENTION AUDITORIUM OPENS;

\$8-Million Bond Issue Is Unnecessary

Above—The Palm Room which can accommodate 1000 persons at banquets has just been completed at a cost of \$400,000, relieving the taxpayers of the necessity of a multi-million dollar bond issue for a civic auditorium.

Hotel Aids Tourism Program

The largest addition to the U. S. Grant Hotel since the historic San Diego structure was dedicated in 1910 was completed this month with final work on the new Palm Room.

The \$400,000 project required four months and created a banquet and ball room capable of serving 1,000 people. Overall dimensions are 100 by 100 feet, said Carlton S. Lichty, general manager of the hotel.

The second floor structure replaces the old Palm Court. Meeting rooms of various sizes adjoin the big room and a complete kitchen, 25x100 feet serves the new area. It is completely soundproofed.

The room itself includes a big rades. See Calendar of Events.

stage. Color lighting effects are obtained by cold cathode indirect lighting in the primary colors. The center area of the unobstructed floor may be cleared of carpeting in a few minutes to accommodate dancers.

Lichty said that the "big room" was built by the hotel in order to assist San Diego's drive to obtain addition convention business.

MILITARY ESTABLISHMENTS

Some of the most important links in the chain of national defense are located in San Diego. The nation's largest Naval Air Station, the world's finest Naval Training Station, the Coast Guard Base and the Marine Corps Recruit Depot for all activities west of the Mississippi are just a few of the mighty military installations here. Visitors are invited to attend reviews and pa-

OLD MISSION

San Diego is the home of the first of the missions in the California chain built by the Spaniards in the 1700's. The Mission San Diego de Alcalá in Mission Valley, is open daily to the public

PRESIDIO PARK

Presidio Park marks the site of the first settlement on the West Coast, Junipero Serra Museum there, houses fascinating collections of historical interest and value. Above Old San Diego.

BALBOA PARK

A 1400 acre recreational area located in the heart of San Diego. Balboa Park is one of the largest and most beautiful city parks in the world. Its elaborate buildings were constructed for the International Expositions of 1915 and 1935.

Do I come to full stop at a stop

Navy Relief Needed Here, For Sure!

Glad to have you aboard?—The time-honored Marine Corps situation doesn't seem to be shared by this Marine-turned-cowboy and his mount, a very determined Brahma bull. This scene, from last year's Navy Relief Rodeo Carnival, will be enacted many times over June 9 and 10 at Camp Pendleton when amateur oyboys, Marines and sailors the other 363 days of the year, pit their skill against some of the West's orneriest stock. The two-day rodeo, free to the public, is an annual event conducted in conjunction with a carnival to raise money for the Camp Pendleton auxiliary of the Navy Relief Society.
